Rokko Wins Prestigious Supplier Excellence Award from Dallas-based Texas Instruments

SINGAPORE/MANILA, 10 May 2011 – Singapore Exchange Catalist-listed **Rokko Holdings Ltd.** (“**Rokko**”) announced today that its wholly-owned subsidiary, Rokko Systems Pte. Ltd. (“**Rokko Systems**”), has won the prestigious 2010 Supplier Excellence Award from the semiconductor giant, Texas Instruments (**TI**).

Rokko’s founder and Managing Director, Mr. Gary Lim, received the award in the Philippines on behalf of Rokko Systems, which designs and manufactures automated equipment for the semiconductor “back-end” assembly processes.

For the past 28 years, TI has honoured businesses that deliver superior service and support through the annual Supplier Excellence Award (SEA) program, a key vehicle for communicating standards and expectations to suppliers of materials, equipment and services.

TI’s Vice President, Worldwide Procurement and Logistics, Mr. Rob Simpson said, “TI is fortunate to have a global base of reliable suppliers to contribute to its supply chain stability, especially through the recent earthquake and tsunami in Japan.

Rokko has consistently delivered excellent support to TI, and we are proud to recognise Rokko with this Supplier Excellence Award for their commitment to us.”

“This award – the third that Rokko Systems has won from TI in the past 5 years – is a huge honour that underscores the relentless commitment and dedication which Rokko places on its valued customer support. On behalf of the entire Rokko team, I would like to express our deepest appreciation to TI for its continued support, confidence and trust in us,” said Mr Gary Lim.

End of Release

About Rokko Holdings Ltd.

Established in 1994, Rokko Holdings Ltd. (“**Rokko**”) and its subsidiaries (the “**Group**”) provide precision engineering services to well-established customers in the semiconductor and electronics industries. The Group has four main business segments – Equipment – the design, development and manufacturing of automated equipment and the marketing of semiconductor equipment; Tooling – the design, development and manufacturing of precision tools used in the front-end and back-end processes of the semiconductor manufacturing process; Metal Stamping – the provision of leadframes and connectors stamping for the electronics industry and; Leadframes – the provision of plating and etching services for the semiconductors industry. The Group has a presence and manufacturing facilities located in Singapore and Malaysia, with a global customer base.
